**Question for ODD roll numbers:**

You are required to replicate the image given below using HTML.

Required images are given in the folder uploaded on your Google Classroom folder.

You are required to make a Navigation bar using 'div' tag, bootstrap is not necessary.

Color code for the navigation bar is #822926. In the navigation bar, you are required to make four links, i.e., Home, Fiction, Thrill, and Mystery. On the top right corner of the navigation bar make a button that states "Sign in to 22ixxxx", where xxxx is your roll number.

Moving on, set the image given in the folder as a background image, add the text as shown in the image above. Then add three more images, which are available in the folder.

At the end add a footer with your roll number.

All the links on the navigation bar i.e., Home, Fiction, Thrill, and Mystery, and the sign in button, should go to a next page that includes just a button which states "back to main page" and a 404-error image, as shown in the image attached below. On clicking the button, it should link us back to the main page.
