**Question for EVEN roll numbers:**

You are required to replicate the image given below using HTML.

You are required to make a Navigation bar using 'div' tag, bootstrap is not necessary.

Color code for the navigation bar is #B62E73.

In the navigation bar, you are required to make four links, i.e., Home, Breakfast, Lunch, and Dinner. On the top right corner of the navigation bar make a button that states "Sign up to 22ixxxx", where xxxx is your roll number.

Moving on, set the image given in the folder as a background image, add the text as shown in the image above. Then add three more images, which are available in the folder, and add some text underneath it as shown. At the end of the main content, you are needed to add a text in italic to the bottom right of the page.

At the end add a footer with your roll number.

All the links on the navigation bar i.e., home, breakfast, lunch, dinner, and the sign-up button, should go to a next page that includes just a button which states "back to main page" and a 404-error image, as shown in the image attached below. On clicking the button, it should link us back to the main page.
